

## What is Atlas UserVoice?

**1** **Atlas UserVoice Link:** <https://atlas.uservoice.com>

**i** **Atlas user's voice portal**

We have partnered with UserVoice, a third-party service and your use of the portal and your submissions subject to the UserVoice Terms of Service & Privacy Policy. Please do not send any novel or patentable ideas, copyrighted materials, samples or demos for which you do not want to grant a license to ClearPeople.

At ClearPeople we love to create products that are User Experience centric, here you will be able to search and support existing ideas or add your own feedback to help us shape Atlas.

If you have suggestions for how we can improve, please share them with us here. While we can't respond to every suggestion, we are committed to reading every post and consider it thoughtfully to improve Atlas.

### Launching Atlas UserVoice

**1**

Opening UserVoice:  
- Use the Link to access

**i**

What is UserVoice?  
- View a description of how you can help to make improvements to Atlas

## What is Atlas UserVoice?

### How it works

- Select one of the feedback forums from the list below
- Check out the ideas others have suggested and vote on your favorites
- Include one suggestion per post

Thanks for joining our community and helping improve Atlas. We're happy you're here!

MIP "Sensitivity labels" on "ConneX"

Microsoft is supporting MIP Sensitivity labels on Microsoft 365 groups, SharePoint sites and Teams groups. It would be nice to have the ability to specify the Sensitivity label for a new workspace when it is created from the "New Workspace" button in **ConneX**.

More info: <https://docs.microsoft.com/en-gb/microsoft-365/compliance/sensitivity-labels-teams-groups-sites?view=o365-worldwide#enable-this-preview-and-synchronize-labels>

Please consider adding MIP "Sensitivity labels" to "**ConneX**" to allow setting this value while creating a new workspace.

### First steps to making a suggestion

1

Enter your Suggestion or area of Atlas, and press return:  
- This will check existing ideas

2

Vote for an existing idea:  
- The idea with the most votes could be added to a future release

3

Post a New Idea:  
- If there are no results then select Post a New Idea

## What is UserVoice?

### Post an Idea

1

Enter your suggestion  
- Choose a Category  
(Displayed to the right)

2

Describe your idea  
- Provide the details to your suggestion

3

Drop or upload files  
- If it will aid your suggestion please add supporting files

4

Select Post Idea  
- This will send your suggestion through to our Atlas Team

VOTE

**Editable 'My Atlas' wording in My Atlas menu title**

It would be great to have the ability to remove 'My Atlas' wording from inside the My Atlas menu and replace with the customer's system name i.e. 'My Salta' to reduce confusion among end-users who are not aware of what Atlas is.

Note, It does not necessarily have to be an editable field from the Atlas config site - it could be updated on deployment or via scripts from CP Developers.
